SUMMARY

Senior Software Engineer with **9 years of experience** building scalable, high-performance frontend systems. Strong expertise in **React-based architectures, micro-frontends, pricing platforms, and payment flows**. Proven track record of leading frontend initiatives, improving delivery velocity, and shipping business-critical features under tight timelines.

SKILLS

- **Frontend:** React, JavaScript, TypeScript, HTML/CSS, LESS, SASS, Webpack, Micro Frontends, Redux
- **Testing:** Jest, React Testing Library
- **Platform & Tooling:** Git, CI/CD, Webpack Module Federation
- **Quality & Observability:** SonarCloud, Elastic APM
- **AI Productivity Tools:** GitHub Copilot, Cursor, ChatGPT (PR reviews, refactoring, test generation)

EXPERIENCE

- **Brevo (Formerly Sendinblue)** Noida, India
Senior Software Engineer Nov 2021 – Present
 - **Led frontend development for Pricing V4 and V5**, managing a team of 6 engineers and owning delivery of pricing and checkout flows.
 - **Pricing V5:** Migrated to a **single-vertical, add-on-based pricing model**, launching a **new Pro plan** (between Business and Enterprise) and a new sales package; delivered end-to-end in **6 months**.
 - Integrated **Adyen and Stripe** payment gateways, enabling scalable, multi-country payment support.
 - Designed and scaled **micro-frontend architecture** using Webpack Module Federation, ensuring shared navigation and independent team ownership.
 - Improved Lighthouse scores from **50 to 90+**, reduced bundle size by **60%**, and improved FCP by **40%** through lazy loading and code splitting.
 - Ensured **production stability during Brevo rebranding**, coordinating frontend theme changes and QA validation on the new domain.
- **Brevo (Formerly Sendinblue)** Noida, India
Software Engineer Sept 2019 – Dec 2021
 - Developed **end-to-end V2 pricing and checkout journeys**, focusing on state management and API integration.
 - **Decoupled pricing frontend from a Symphony-based monolith**, creating a dedicated React repository with full frontend ownership.
 - Architected reusable **shared UI bundles as libraries**, reducing cross-team dependencies and release timelines.
 - Integrated **PayPal and Direct Debit** payment methods across pricing and checkout flows.
 - Optimized legacy React components, improving application responsiveness and maintainability.
- **Afinoz** Noida, India
Software Developer July 2017 – Sept 2019
 - Built Afinoz's main website using **React and MaterializeCSS**, reducing homepage load time from **9s to 0.8s**.
 - Led development of **Personal Loan, Business Loan, eligibility, application, blog, and bank pages**.
 - Implemented SEO optimizations using **dynamic JSON-LDs** and Node.js scripts for content scraping and sitemap generation.
 - Developed an **in-house CMS** with a rich text editor for non-technical content management.
 - Built an internal **CRM dashboard** using Chart.js, Redux-Persist, and local storage caching.

EDUCATION

- **Ajay Kumar Garg Engineering College** Uttar Pradesh
B.Tech in Computer Science 2013 – 2017
