SUMMARY

Senior Software Engineer with **9 years of experience** building scalable, high-performance global frontend systems. Expert in micro-frontends, multi-vertical pricing engines and checkout flows. Proven track record driving web performance (Lighthouse 50 to 90+), mentoring teams and leveraging advanced AI-assisted agentic engineering (MCP, spec-driven development) to dramatically accelerate feature delivery under tight timelines. Open to international relocation and remote contracts.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, HTML5, CSS3, SASS, i18n

Architecture: Micro Frontends (MFE), Webpack Module Federation, Cloudflare Workers, Design Systems

Quality & Perf: Jest, React Testing Library, SonarCloud, Elastic APM, Lighthouse, Code Splitting

AI & Tooling: Cursor IDE, Model Context Protocol (MCP), Agentic Workflows, Spec-Driven Development, GitHub Copilot

PROFESSIONAL EXPERIENCE

Brevo (Formerly Sendinblue)

Jan 2022 – May 2026

Senior Software Engineer

Noida, India

- **Led development for next-gen single-vertical and add-on subscription models**, launching a new Pro tier and enterprise sales packages within a strict 6-month deadline by leveraging AI-assisted coding tools for accelerated development and automated unit testing.
- **Engineered unified multi-vertical pricing architectures**, integrating CRM, Conversations and Phone services into a seamless, multi-gateway checkout experience powered by Stripe and Adyen.
- **Architected agentic AI engineering workflows**, using Model Context Protocol (MCP) to connect Cursor IDE with Figma/design tokens and establishing project-specific rules for automated design-to-code syncing.
- **Pioneered Spec-Driven Development using multi-agent loops**, standardizing phased workflows (spec gathering via scratch-pads → planning mode → implementation mode → automated code review loops) to increase team velocity.
- **Designed and scaled micro-frontend architecture** using Webpack Module Federation, ensuring shared cross-application navigation and independent squad ownership.
- **Optimized web performance**, elevating Lighthouse scores from 50 to 90+, reducing bundle size by 60% and cutting FCP by 40% via strategic code-splitting.

Brevo (Formerly Sendinblue)

Sept 2019 – Dec 2021

Software Engineer

Noida, India

- **Developed end-to-end pricing and checkout user journeys**, optimizing complex state management and integrating Adyen, Stripe, PayPal and Direct Debit payment streams.
- **Implemented multi-language app support across 6 global locales**, architecting scalable internationalization (i18n) workflows for seamless localized user experiences.
- **Decoupled pricing infrastructure** from a legacy Symfony-based monolith, creating a dedicated React repository with full frontend team ownership.
- **Architected reusable shared UI bundles** as standalone libraries, significantly reducing cross-team dependencies and release timelines.

Afinoz

July 2017 – Sept 2019

Software Developer

Noida, India

- **Spearheaded migration of the flagship website to React**, reducing homepage load time from 9s to 0.8s while leading the development of core Personal/Business Loan application flows.
- **Developed an in-house CMS** with a custom rich-text editor for content management alongside a secure internal CRM data dashboard built with Chart.js.
- Implemented dynamic JSON-LD SEO optimizations and Node.js content scrapers to boost search indexing.

EDUCATION & ACHIEVEMENTS

B.Tech in Computer Science

2013 – 2017

Ajay Kumar Garg Engineering College, Uttar Pradesh

1st Prize — SIBTHON Hackathon

2020

Awarded for designing and developing high-impact internal tooling at Brevo.
